

Effectively Managing Transit Emergencies

Provides information to develop and implement transit emergencies management programs.

ELEMENTS OF THE COURSE:

- ❖ Nature of emergency and disasters
- ❖ Emergency organizations and coordination of response efforts and resources, incident command stations, and command vehicles
- ❖ Emergency management concepts
- ❖ Development management training
- ❖ Managing media relations
- ❖ Table-top simulations and group exercises

WHO SHOULD ATTEND?

General managers, safety managers, human resource managers, risk managers, security personnel, operations supervisors, field supervisors, and public relations officers. Representatives of community emergency support services, such as law enforcement, fire protection, FEMA, civil defense, and emergency medical responders.

OBJECTIVES:

1. Understand the purpose, development and implementation of a proactive emergency management plan and how it relates to safety and security.
2. Knowledge of the elements of an effective emergency management program, including acquisition and management of an incident command station.
3. Transit role in responding to community emergencies and disasters
4. Experience relating the roles and cross-jurisdictional responsibilities of community emergency responders
